

RACKMAN EXTRA LIGHT DUTY CANTILEVER RACKING

Being the first and only supplier of Extra Light Duty Cantilever Racking Australia wide is no easy feat as we always strive to provide you with the perfect solution, no matter your requirements.

This system is designed for storing kayaks, aluminium, timber, and other light applications while featuring:

- A safe work loading of 100kg UDL per arm
- The option to be free-standing or bolted into a concrete panel to eliminate the need for bases and bracing
- A selection of either Powder Coating or Hot Dip Galvanising (not available in all dimensions)
- Single and double-sided options that provide maximum storage capacity
