

RACKMAN STEEL SHELVING KITS

Our Steel Shelving Kits are popular across a large range of industries and applications ranging from office archiving through to industrial small parts storage.

Carefully packaged to eliminate any damage whilst in transit, this system can have as many or as few adjustable shelves in 25mm increments and features:

- Designed to fit perfectly with our metric range of picking bins and part trays
- Each shelf can hold approximately 80kg UDL and is available in both single sided and double-sided variations
- Modular bays with each bay consisting of a shell with adjustable shelves, plus it's flat-packed for easy transport and assembly
- Options include solid or cross braced backing, steel dividers and wire racks for lateral files
