

RACKMAN MEDIUM/HEAVY DUTY CANTILEVER RACKING

Rackman Australia's Medium and Heavy Duty Cantilever Racking systems are perfect for storing building and construction materials like steel bars, pipes, tubing, gyprock, plasterboard, sheet steel or timber.

With different heights, arm lengths, and varying distances between the posts, it features:

- 🔗 Arms that can support up to 1,500kg UDL each (depending on configuration)
- 🔗 Single and double sided options that provide maximum storage capacity
- 🔗 A fully customisable system tailored to the users requirements
- 🔗 Available in a wide range of configurations
